- = data not available, 0 or 0.0 = magnitude is less than half of unit employed, GDP = gross domestic product, kWh = kilowatt-hour, PPP = purchasing power parity.
- Data are based on income.

 Data for 2012 was based on new national poverty line stipulated in the country's rural poverty reduction target for 2012.

 Data is based on consumption and combines the urban and rural distributions, weighted by share of urban and rural population to total Derived from the consumption share of the highest quintile to lowest quintile.

 Estimates are based on data officially reported to World Health Organization (WHO) and the United Nations Children's Fund (UNICEF) to Estimated using data from Global Health Workforce Statistics (WHO) and population from World Population Prospects: The 2012 Revisi
- . ization (WHO) and the United Nations Children's Fund (UNICEF) by me
- Figure for 2010 refers to nurses only.
- Data refer to central government. From 1990 to 2005, health expenditure is included in the education category. Measured as the ratio of female gross enrollment ratio to male gross enrollment ratio. Measured as the ratio of female labor force participation rate to male labor force participation rate.

- Presented in standard normal units of the governance indicator, ranging from -2.5 to 2.5 with higher values corresponding to better governance outcomes.
