Highest-to-lowest ratio
Gender parity in labor force participation (Aged 15 and over) ⁱ	0.87	0.80 (2012)
Percentage of seats held by women in national parliament	2.8	15.8 (2013)
PILLAR THREE: Social Safety Nets		
Social protection and labor rating
Social security expenditure on health as a percentage of government expenditure on health	7.1 (1995)	9.9
Government expenditure on social security and welfare as a percentage of total government expenditure ^g	3.5 (1995)	8.5 (2012)
GOOD GOVERNANCE AND INSTITUTIONS		
Voice and accountability ^j	0.3 (1996)	−0.4
Government effectiveness ^j	0.3 (1996)	0.1
Control of corruption ^j	−0.2 (1996)	−0.4

- "..." = data not available, 0 or 0.0 = magnitude is less than half of unit employed, GDP = gross domestic product, kWh = kilowatt-hour, PPP = purchasing power parity.
- a Data are based on consumption.
 - b The entire series is updated based on revised national poverty line in 2013, and cannot be compared with previous published series.
 - c Derived from consumption shares of the highest quintile and lowest quintile groups.
 - d Estimates are based on data officially reported to the World Health Organization (WHO) and the United Nations Children's Fund (UNICEF) by member economies and data reported in publications on health surveys.
 - e Estimates are based on household survey data.
 - f Estimated using data from Global Health Workforce Statistics (WHO) and population from World Population Prospects: The 2012 Revision.
 - g Data refer to central government.
 - h Measured as the ratio of female gross enrollment ratio to male gross enrollment ratio.
 - i Measured as the ratio of female labor force participation rate to male labor force participation rate.
 - j Presented in standard normal units of the governance indicator, ranging from −2.5 to 2.5 with higher values corresponding to better governance outcomes.
