... = data not available, \* = provisional, preliminary, ADB = Asian Development Bank.

a Regional aggregates are weighted averages estimated using population of annual live births for the respective year headings. The data for maternal, under-5, and neonatal deaths are from United Nations Statistics Division databases. Aggregates are derived for reporting economies only. Aggregates for East Asia exclude Hong Kong, China and Taipei, China.

b Based on population-based national household survey data and routine health systems.

c Estimates are aligned with the standard definition of doctor, nurse, and/or midwife.

d Includes other health personnel not in alignment with the standard definition.

e No clear definition of health personnel.

f Calculated based on known births and deaths.

g Institutional birth including all deliveries that occurred at a health facility.

## Goal 3. Ensure healthy lives and promote well-being for all at all ages

Table 1.3.3: Selected Indicators for Sustainable Development Goal 3—Mortality Rates, Health (continued)

ADB Regional Member	Target 3.7: By 2030, ensure universal access to sexual and reproductive health-care services, including for family planning, information, and education, and the integration of reproductive health into natural strategies and programs		Target 3.8: Achieve universal health coverage, including financial risk protection; access to quality essential health-care services; and access to safe, effective, quality, and affordable essential medicines and vaccines for all		Target 3.9: By 2030, substantially reduce the number of deaths and illnesses from hazardous chemicals and air, water, and soil pollution and contamination		
	3.7.1: Proportion of Women of Reproductive Age (Aged 15–49 Years) Who Have Their Need for Family Planning Satisfied with Modern Methods		3.7.2: Adolescent Birth Rate (Aged 15–19 Years) per 1,000 Women in That Age Group		3.8.1: Coverage of Essential Health Services <sup>b</sup> (index in a unitless scale of 0 to 100)	3.9.1: Mortality Rate Attributed to Household and Ambient Air Pollution (per 100,000 population)	3.9.2: Mortality Rate Attributed to Unsafe Water, Unsafe Sanitation, and Lack of Hygiene (per 100,000 population)

... = data not available, ≥ = greater than or equal to, - = magnitude equals zero, ADB = Asian Development Bank.

a Data refers to crude suicide rates (per 100,000 population).

b The universal health coverage service coverage index is a single indicator that is calculated based on tracer indicators (some of which are proxies of service coverage) to monitor coverage of essential health services. For presentation purposes, index values of 80 and over are reported as "≥80" to avoid comparisons that are not meaningful. This should not be interpreted as a target.
