Brief Description of the Project:

The project will construct two 230 kilovolt (kV) transmission lines (approximately 300 kilometers [km]) with five 230 kV substations, 48 medium voltage substations, and 820 km of distribution lines in five regions in Myanmar. The project will also install computerized systems to improve operational efficiency and reduce losses in the transmission and distribution systems. The project will contribute to increasing electricity supply to support inclusive and sustainable development, and to achieving the country’s plan of universal electricity access by 2030. The estimated project cost is US$309 million.

Brief Description of Works, Goods and Related Services to be procured:

The proposed project will procure the following:

1. Design, supply, installation and commissioning of: (i) 230kV Alone-Thida transmission line with substation; (ii) 230kV Maylamyine-Ye-Dawei substation, and (iii) 230kV Maylamyine-Ye-Dawei transmission line;
2. Supply and delivery of transformers, switchgears and accessories, conductors and cables, insulators, fittings and clamps, concrete poles, and pole line hardware and steel parts;
3. Distribution lines and substations installation works;
4. Computerized Asset Management System (CAMS);
5. Computerized Customer Billing System (CBBS), and
6. Project Implementation Consultants (PICs)

The said works, goods and related services will be procured through international competitive bidding (ICB) using ADB’s single-stage: two-envelope bidding procedure, and in accordance with ADB’s Procurement Guidelines. The PICs will be selected in accordance with the Guidelines on the Use of Consultants by Asian Development Bank and Its Borrowers.
